

ACMEI EXPO 2014 AT “FIERA DEL LEVANTE” IN BARI

In Puglia's main city, from 9th to 12th October,
another unmissable event with **RICCINI**

The participation of **Riccini** to this event, which will take place in the **new pavilion** of the exhibition area in Bari **from 9th to 12th October**, has been confirmed.

The **innovation-oriented mark**, which is the philosophy at the base of this exhibition (young but it has already distinguished itself for the **originality** and **interest it raised** in the sector), adheres to the spirit that permeates **our Company** from the start.

Some images of ACMEI EXPO 2012

As a matter of fact, **Riccini**, throughout **60 years** from its foundation, has **regularly** and **continuously** introduced a lot of **new products**, starting from **corrugated double wall cable conduits** in HDPE, of which Riccini has been **one of the first featurers in Italy**.

During its **decennial history**, Riccini has never stopped proposing **innovation**, in a path of excellence **quality**. In our exhibition space, along with our corrugated double wall cable conduit "Corrugar" **N 450N** series in HDPE marked IMQ (available in spools and/or bars **450N** and **750N** series, depending on the diameters), you will see our **single pipes** and **flat triple pipes** as well as **starlike triple pipes** in PE for **optical fibre telecommunication networks** and **inspection wells** in PP.
