

GEOFLUID 2014: A CONFIRMATION

The Piacenza event, ended on the 4th of October, has not disappointed the expectations. Great public success and interest for the **RICCINI** products

GEOFLUID 2014 has just ended and it is already possible to take stock of the first and gratifying analysis.

The number and the quality of the contacts we started over the four days of the event encourage **Riccini** expectations.

Image of the Riccini stand at Geofluid 2014

It is not a news for this event which is a **traditional chance** for our Company to **meet, exchange and examine in depth** commercial and technical issues; **clients** who visited us in order to **be updated on our products** were many and also visitors that, thanks to such an event, could **approach to our products** in order to know them, and, hopefully, **appreciate them more and more**.

Some of the products exhibited

Among the sources of **great satisfaction** for **Riccini** there is the confirmation that their philosophy, made of **hard work, seriousness, quality** and **reliability**, is recognized and appreciated.

Currently in this situation of general stagnation of the national market, it has great relevance the **good trend** of the **Riccini** Export division, which has been confirmed by the **increasing contacts** with **foreign operators**.

In the image, together with some of our numerous and appreciated visitors, you can see our Commercial Manager Dr. Fabio Franceschini (the first one on the left), our Sales Manager Dr. Stefano Silvestri (standing next to the desk) and our pretty and expert hostess Giulia

We greet with a gentle smile our **visitors** and we thank them for the **concrete interest** they expressed for our **products** and **work**.

*We know that you will be able to **appreciate** the meaning that we have always given to the word **Quality...with a capital Q!***

Geofluid 2014: an important confirmation, with significant results...
See you next edition!
