MEETING IN BOLOGNA

A trio of news:
new exhibition site, new date of the event
and...
NEW RICCINI PRODUCT!

Riccini, for several years now, consider H₂O fairground as one of its most traditional and unmissable events.

The 2014 edition, placed in the **new site of Bologna** and in a new collocation in the calendar, **no longer in May but in October**, represents an excellent opportunity to see and know **the new SUPERFLUID pipe**.

Some images about the Riccini stand H₂O 2012 edition

This new and extraordinary pipe for sewage networks will be displayed in our stand (**hall 30 – stand B47C84**).

SUPERFLUID represents, in the field of polyethylene double wall pipes for sewage systems, a true **evolution of the species, a leap ahead**.

Next RICCINEWS will furnish other details on **SUPERFLUID**, the **first of a new species!**

After all, Riccini DNA is characterised by the genes of **innovation**, technological **development**, **research** of **excellence**; for this reason our pipes, we say that without false modesty, are among **the most high quality-level** products in the national panorama and even beyond.

We produce **high modulus polypropylene** (PPHM) and **polyethylene** (PEHD-PE100 and PEBD) pipes with **structured double wall**, with **triple layer compact wall** or **full wall** for **sewage systems**, **irrigation**, pressurised transport of **drinkable water** and **gas**, **geothermal probes**, **no-dig technology** works, traditional or **cladded drainage pipes**, **water wells** and **thermal wells**, Riccini range of products contains also **slotted and micro-slotted pipes** for **draining**, **leachates** collection, **biogas** intakes, **wastewater** disposal, **sub horizontal** drains as well as **corrugated double wall cable conduits** in HDPE (in spools or bars) for **electric or telecommunication networks**, **mono tubes and triple tubes** in PE for **telecommunication networks** in **optical fibre**, fittings and **special pieces** for our pipes, **inspection wells**.

The historic location in Ponte Felcino (PG) The new location in San Martino in Campo (PG)

More than sixty years of experience, many years of **success** in markets of **different sectors**, continuous **evolution**, engagement in **research**, coherence with a **company philosophy** made of **seriousness**, attention towards **clients**, **reliability**, **competence**, ability to **read and understand the market needs**, continuous **exchange relation** with **operators**, **designers**, **technicians**, **research** institutions, **raw material** manufacturers...

You can find all that in our products, in their ability of being **answers to your requests**; all that is summarized in our motto: **"Simplify your work is our job!"**...

For all that, when visiting our stand, you will be welcomed by the **smile** of someone who is **proud** about his job, **happy** to show it to you, **sure** about meeting your interest and your esteem.

See you in Bologna!
